With new laws and regulations passed every year, running a medical practice can be complicated. While the California Medical Association (CMA) works hard every day to lighten unnecessary burdens and streamline information, we are also your best source of knowledge to effectively answer difficult questions about practicing medicine in California.

CMA’s online health law library contains nearly 5,000 pages of CMA On-Call documents and valuable information for physicians and their staff. Access to the library is free to members.

Have you ever asked...

- What is the process for terminating the physician-patient relationship?
- What restrictions apply to electronic prescribing of controlled substances?
- I’m having issues with a member of my staff—what are the legal steps required to terminate employment?
- What can I do regarding a negative online review about my practice?
- How long do I have to retain medical records?
- How can I challenge my quality rating in a pay-for-performance program?
- I’m looking to grow my practice—are there laws that govern physician advertising?
